The screenshot shows a REST client interface with the 'Body' tab selected. The body is set to 'raw' and contains a JSON object with the following structure:

```
1 {  
2   "name": "Radita Nuraini",  
3   "category": "mahasiswa",  
4   "details": {  
5     "NIM": "103122400056",  
6     "roleTechManifest": "Backend, Database, AI Engineer",  
7     "techStack": "Java, MySQL, Flutter"  
8   }  
9 }
```

a.

The screenshot shows a REST client interface with a POST request to `https://lxxvnrhuwjtktsrllws.supabase.co/rest/v1/products`. The request body is the same JSON object as in the previous screenshot. The response is a 401 Unauthorized error with the following JSON body:

```
1 {  
2   "message": "Invalid API key",  
3   "hint": "Double check your Supabase 'anon' or 'service_role' API key."  
4 }
```

b.

- Gunakan method GET pada URL yang sama dengan menambahkan query `https://lxxvnrhuwjtktsrllws.supabase.co/rest/v1/products?name=eq>NamaKalian` untuk memverifikasi bahwa data telah tersimpan, lalu skrinkut hasil respons di Postman.
